Efficiency in Streamlined Workflo

P9 inherits a high-end ultrasonic platform and is combined with a variety of workflow-enhanced technologies, such as user defined presets, intelligent storage, an one-key optimization, to create a stable working environment and a convenient oper experience for clinical diagnosis.

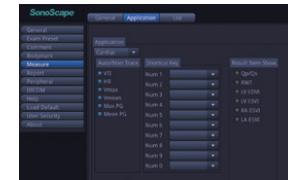

The P9 is a new color doppler ultrasound diagnostic system from Sonoscape. Ergonomically small and flexible in appearance while intrinsically strong in performance, the P9 expands the variety of advanced imaging functions to easily meet the needs of increasingly diversified clinical applications.

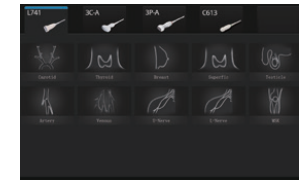

Auto IMT

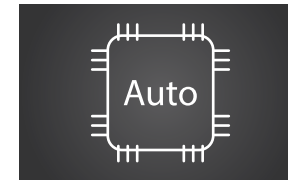

Auto Trace

User-defined Operation

Quick Preset

One-key Optimization

Quick Storage and Transfer

Comfort in Ingenious Design

Large size monitor and sensitive touch screen

Intuitive control panel and scientific division

Built-in sliding keyboard

Palm rest design

Cable management holder

Large capacity built-in battery
